

Nishu

Software Engineer | Mohali, Punjab, IN | nishumca22@gmail.com | +91-9368754661 | linkedin.com/in/@nishu2201

PROFESSIONAL SUMMARY

Software Engineer with ~2 years of professional experience building enterprise-grade integrations using REST APIs, AWS services (S3, Lambda, SQS, SES, EventBridge), and event-driven architectures. Currently engineering FSC-Bridge, a production-grade open-source microservices system in Java 17, Spring Boot 3.x, Apache Kafka, and PostgreSQL. Experienced in multi-environment deployments (dev/prod), CI/CD pipelines, Docker, Kubernetes, and Agile delivery. Strong foundation in software design patterns, secure coding practices, and scalable backend architecture.

WORK EXPERIENCE

Software Engineer | Webner Solutions Pvt Ltd. | Mohali, Punjab, IN July 2024 – Present

- Designed and integrated a REST API-based AL3 (ACORD) file ingestion pipeline — parsing carrier files into JSON and routing structured data to AWS S3 — using Lambda, SQS, SES, EventBridge, and CloudWatch for event-driven automation and monitoring.
- Diagnosed and resolved critical Lambda timeout failures on large daily payloads; re-architected solution with chunked JSON processing, UUID-named S3 folder storage, and event-driven scheduling — reducing large-file failures from near-100% to zero.
- Applied IAM Role-based access control, secure credential management, and AWS-integrated workflows; maintained production deployments across Sandbox, UAT, and Production environments.
- Collaborated directly with US-based clients to gather requirements, translated business needs into technical solutions, and guided team members on implementation — delivering production-ready features in Git-based Agile sprints with code reviews.

PROJECTS

FSC-Bridge — AI-Powered Migration Engine (Open Source, In Progress) — Java 17, Spring Boot 3.x, Spring AI, Apache Kafka, PostgreSQL, Docker, Kubernetes, GitHub Actions

- Engineered a production-grade microservices application in Java 17 and Spring Boot 3.x with a 5-module Maven multi-module architecture (core, connector, mapper, audit, web) — each service independently deployable and testable.
- Integrated Spring AI with Google Gemini LLM for intelligent field mapping suggestions, natural language migration job parsing, and AI-generated migration summaries; implemented Apache Kafka event streaming (3 topics, producer/consumer pipeline) for async, decoupled migration progress events.
- Built Spring Batch chunk-processing pipeline with configurable chunk size, fault tolerance, skip logic, and PostgreSQL job state persistence — enabling pause/resume for 50,000+ record migrations; added pre-flight validation engine with 6 automated checks including API governor limit estimation.
- Secured credentials with Jasypt AES-256 encryption and custom Logback MaskingPatternLayout to redact tokens/secrets from logs; added Micrometer custom metrics (Counters, Timers) tracking p50/p95/p99 job duration via Spring Actuator.
- Containerized with Docker + docker-compose (app, PostgreSQL, Kafka); wrote Kubernetes manifests and Helm charts with health probes and resource limits; built GitHub Actions CI/CD pipeline with JUnit 5/Mockito testing, Docker build, and registry push on every merge to main. Each service independently deployable and testable; developed using AI-assisted workflows (Claude Code, Gemini) to accelerate architecture decisions and code quality.

AL3 Carrier Integration — Enterprise Data Pipeline — Java, REST APIs, AWS Lambda, S3, SQS, SES, EventBridge, JSON Processing, IAM

- Built and maintained a production REST API integration pipeline processing daily AL3 insurance carrier files — converting structured ACORD data to JSON and routing to AWS S3 — serving as the core data ingestion layer for downstream business operations.
- Implemented event-driven scheduling, error handling, and CloudWatch monitoring across the pipeline; redesigned chunked processing architecture that eliminated large-payload failures and enabled 500+ successful downstream records created.

TECHNICAL SKILLS

Languages & Frameworks: Java 17, Spring Boot 3.x, Spring AI, Spring Batch, Spring Security, REST APIs, Hibernate/JPA, Maven, JavaScript, SQL

Cloud & Infrastructure: AWS (S3, Lambda, SQS, SES, EventBridge, CloudWatch, IAM), Docker, Kubernetes, GitHub Actions CI/CD, Apache Kafka

Databases & Tools: PostgreSQL, H2, Git, Jasypt Encryption, Micrometer, OpenAPI/Swagger, JUnit 5, Mockito, VS Code, IntelliJ

EDUCATION

Master of Computer Applications (MCA) | GPA: 8.5 | Chandigarh Group of Colleges, Landran, Mohali 2021 – 2023

B.Sc. Information Technology | GPA: 8.47 | Motherhood University, Roorkee 2017 – 2020

ACHIEVEMENTS & CERTIFICATIONS

- Agentforce Certification — Salesforce (self-directed learning, 2025)
- Good Performer Award — Two consecutive cycles (Apr 2025–Oct 2025 & Oct 2025–Apr 2026) at Webner Solutions for consistent high-quality delivery.
- Cash Prize — Table Tennis Tournament, demonstrating teamwork and collaboration beyond the workplace.
